20-<sup>+</sup>✓. 12 p.

## Writing Task 1.

### Airship catastrophe.

James was walking his dog in the park, when he saw some strange... Not far from him was a curved wooden bar protruded into the ground. Coming a little closer, James saw, that the edge of the bar was crooked.

He said, "It is very strange, that such a large bar of wood is in the ground so deep it looks like it fell from height."

At the same second James saw fire in the sky. He immediately ran to a nearby airfield with his dog. He was shocked by what he saw. His face expressed fear and confusion. A huge airship "Hindenburg" was burning.

It happened on May 6, 1937. After 34 seconds it exploded. People jumped from the airship on ropes, but then could not escape. Thanks to James survived with his dog.

$$2 + 2 + 2 + 1 = 7 \text{ (knots.)}$$

$$3 + 3 = 6. \text{ (knots.)}$$

$$= 3$$

19 points.
